

Keep your hands off my XM Satelite Radio.  
This is a paid service that offers me both entertainment and safety while I am in my vehicle. There is nothing that is comparable. The NAB should have no juristiction on this paid service and I urge the FCC to REJECT the petition 04-160. The NAB has been wrong before with TV and FM radio, and it is wrong again by trying to mingle with XM.

Thank you for you time,

Austin
